EDUCATION

Nitte Meenakshi Institute of Technology
B.E, Information Science and Engineering

Bengaluru, India
Dec 2022 – Jun 2026

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C/C++
Cloud & DevOps: Microsoft Azure (ACR, AKS, Container Apps, Azure Storage), AWS, Docker, Kubernetes, Terraform, Ansible, CI/CD (GitHub Actions, Jenkins), Bash/Shell Scripting
Backend: FastAPI, REST APIs, Authentication (OAuth2/JWT), Email Automation, API Integration
Databases: MongoDB, Relational Databases, Data Modeling, CRUD Operations
Python Libraries: pandas, NumPy, scikit-learn, transformers
Tools: Git/GitHub, VS Code, Linux Administration, Jupyter Notebook, Colab
Software Engineering: API Design, Modular Architecture, Integration Testing, Debugging, Agile workflow exposure

EXPERIENCE

Sustainext Bengaluru, India
DevOps & Cloud Engineer Intern Mar 2026 – Present

- Containerized and shipped a production Django application end-to-end on AKS — authored a multi-stage Dockerfile, pushed versioned images to ACR, wrote Kubernetes manifests with RBAC role assignments for secure registry access, and configured VNet-integrated ingress — compressing environment setup from **3 days** to **under 4 hours**.
- Built and rolled out a GitHub Actions CI/CD pipeline adopted by the team, benchmarking it against a Jenkins setup across build speed, secrets management, and maintainability — reducing release cycle time by **65%** and eliminating all manual deployment steps.
- Automated Azure infrastructure provisioning using Terraform and Ansible with reusable IaC modules and Bash deployment scripts, cutting per-environment setup time from **5 hours** to **under 20 minutes**.
- Reduced projected AKS compute costs by **35%** by modelling workload patterns and recommending HPA, VPA, and KEDA autoscaling configurations tuned to peak and off-peak traffic.
- Authored a technical evaluation of Azure–AWS cross-cloud integration via REST APIs, directly informing the client's multi-cloud architecture and IaC tooling decision.

PROJECTS

SmartMeetAI – Intelligent Meeting Assistant | *Python, FastAPI, React, MongoDB* Sep 2025

- Engineered a multi-agent AI pipeline combining real-time transcription, summarisation, and automated email dispatch — cutting post-meeting follow-up time from **~30 minutes** to **under 2 minutes**.
- Resolved cross-service data flow failures across Google OAuth2, Calendar API, and a Chrome extension live caption feed, achieving reliable end-to-end data delivery in production.
- Deployed a full-stack system across FastAPI, React, and MongoDB, integrating 3 third-party APIs with zero data loss across the real-time caption-to-summary pipeline.

LearnAbleAI – AI Assistant for Neurodiverse People | *React, TypeScript, Gemini API* May 2025

- Built a responsive SPA in React + TypeScript with an accessible dark-mode interface, integrating Google Gemini API for Dyslexia, ADHD, and Autism learning modes.
- Improved content accuracy by **30%** through prompt engineering tailored to different learner profiles.
- Boosted performance by **25%** via modular architecture and Text-to-Speech integration.

Insight-Engine – AI-Based Content Intelligence Platform | *React, TailwindCSS, APIs* Aug 2025

- Delivered a real-time content analytics dashboard in React (Vite + TailwindCSS) aggregating multi-source API data into actionable performance trend views.
- Built a data transformation layer that normalised inconsistent API payloads into structured formats, enabling reliable cross-source trend analysis and automated reporting.
- Designed a modular component architecture that reduced feature integration effort by **~40%** by cleanly separating data, logic, and presentation layers.

CERTIFICATIONS & ACTIVITIES

- AWS Academy Cloud Architecting (Solutions Architect track)
- Google Cloud Computing Foundations Skill Badge – Google Cloud
- Machine Learning Fundamentals – Infosys Springboard
- Core member of CloudZilla Club – organized technical events and workshops
- Volunteer – National Service Scheme (NSS)
